

# GENERAL SAFETY RULES

During construction or demolition activities, Contractors and Subcontractors shall also:

- Manage excessive noise through engineering controls such as sound dampening or working during off hours. All local noise ordinances must be managed by the Contractor. Owner reserves the right to designate working hours based on the scope of work being performed (ie: drilling, chipping, use of air hammers, excessive noise, fumes, etc.)
- Maintain a Drug and Alcohol Free Workplace Substance Abuse Program
- Assist in accident investigations with the Owner. When necessary, investigations deemed will be conducted with representatives from the Owner's Security and Safety / Risk Management Departments.
- Enforce their own Site Safety plan.
